

Commander

odor & corrosion control

lift stations

mains

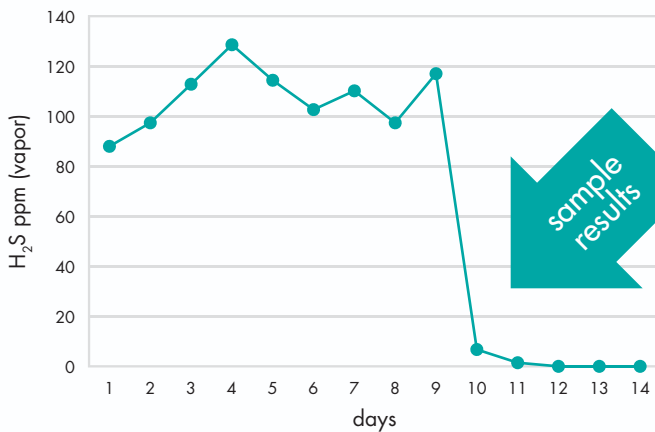

digesters

grease traps

sumps

sludge processing

wet scrubbers

Non-hazardous, eco-friendly **sulFad Commander** is a potent molecular neutralizer that safely converts H₂S and mercaptans to harmless, biodegradable effluent. It solves odor complaints, corrosion and toxin exposure without compromising downstream wastewater treatment.

Highly cost-effective, Commander targets only H₂S and mercaptan molecules, and is not depleted by natural bacteria.

Commander is available in 330-gallon totes and 55-gallon drums:

Commander

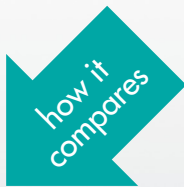

mechanical oxidizers

chemical oxidizers

nitrites

pH neutralizers

iron salts
