

HiVent™

odor neutralization for
pump stations

HiVent™ is a passive vapor phase odor neutralization system for pump stations. It requires no water or electricity, creates no back-pressure, and is maintenance free with no moving parts. It consumes HiScent™ all-natural, environmentally safe odor neutralizer at a typical rate of 5 gallons/year, relying on pumping cycles and natural air movement.

- No electricity, water or maintenance needed.
- Creates no back-pressure, preventing odor leaks.
- Uses pumping cycles, natural air movement and ambient heat to diffuse the HiScent odor neutralizer.
- Odor neutralizer, which is environmentally friendly, all natural and free of harsh chemicals.
- Aluminum design won't corrode.
- Also available for mosquito control.
